this accessible collection examines twelve historic events in the international relations of east asia

from the founding of the ming dynasty in 1368 to the start of the opium wars in 1841 china has engaged in only two large scale conflicts with its principal neighbors korea vietnam and japan these four territorial and centralized states have otherwise fostered peaceful and long lasting relationships with one another and as they have

grown more powerful the atmosphere around them has stabilized focusing on the role of the tribute system in maintaining stability in east asia and in fostering diplomatic and commercial exchange kang contrasts this history against the example of europe and the east asian states skirmishes with nomadic peoples to the north and west although china has been the unquestioned hegemon in the region with other political units always considered secondary the tributary order entailed military cultural and economic dimensions that afforded its participants immense latitude europe s westphalian system on the other hand was based on formal equality among states and balance of power politics resulting in incessant interstate conflict scholars tend to view europe s experience as universal but kang upends this tradition emphasizing east asia s formal hierarchy as an international system with its own history and character this approach not only recasts our understanding of east asian relations but also defines a model that applies to other hegemonies outside the european order

a common misconception holds that marco polo opened up a closed and recalcitrant orient to the west however this sweeping history covering 4 000 years of international relations from the perspective of china japan korea and southeast asia shows that the region s extensive involvement in world affairs began thousands of years ago in a time when the writing of history is increasingly specialized warren i cohen has made a bold move against the grain in broad but revealing brushstrokes he paints a huge canvas of east asia s place in world affairs throughout four millennia just as cohen thinks broadly across time so too he defines the boundaries of east asia liberally looking beyond china japan and korea to include southeast asia in addition cohen stretches the scope of international relations beyond its usual limitations to consider the vital role of cultural and economic exchanges within this vast framework cohen explores the system of chinese domination in the ancient world the exchanges between east asia and the islamic world from the thirteenth to the seventeenth centuries and the emergence of a european defined international system in the eighteenth and nineteenth centuries the book covers the new imperialism of the 1890s the manchurian crisis of the early 1930s the ascendancy of japan the trials of world war ii the drama of the cold war and the fleeting asian century from the mid 1970s to the mid 1990s east asia at the center is replete with often overlooked or little known facts such as a record of persistent chinese imperialism in the region tibet s status as a major power from the 7th to the 9th centuries c e when it frequently invaded china and decimated chinese armies japan s profound dependence on korea for its early cultural development the enormous influence of indian cuisine on that of china egyptian and ottoman military aid to their muslim brethren in india and sumatra against european powers extensive chinese sea voyages to arabia and east africa long before such famous westerners as vasco da gama and christopher columbus took to the seas east asia at the center s expansive historical view puts the trials and advances of the past four millennia into perspective showing that east asia has often been preeminent on the world stage

and conjecturing that it might be so again in the not so distant future

an overarching ambiguity characterizes east asia today the region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes however a mixture of complex and often competing agents and processes has been knitting together various segments of east asia in remapping east asia t j pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in east asia have had a substantial cumulative effect on the broader canvas of international politics this collection is about the people processes and institutions behind that region building in it experts on the area take a broad approach to the dynamics and implications of regionalism instead of limiting their focus to security matters they extend

their discussions to topics as diverse as the mercurial nature of japan s leadership role in the region southeast asian business networks the war on terrorism in asia and the political economy of environmental regionalism throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly

this book offers an interpretive and critical comparative politics analysis of the post 1945 development trajectory of the broad east asian region and its component countries the discussion considers the region and its countries in terms of their historical legacies colonialism war and the preoccupation with development and argues that each country has constructed their own way of ordering political life each created its own political logic arguing that it is an error to judge these countries performance against the model of europe or america preston discusses the era of expansionist colonialism the episode of breakdown in highly destructive regional warfare in the early twentieth century and the subsequent diverse records of china with its party state turned towards a nominal state socialism hong kong confronting the problems of living with distant masters singapore with its elite directed national building and thailand mired in elite resistance to popular political reform

the east asian expansion since the 1960s stands out as a global power shift with few historical precedents the resurgence of east asia examines the rise of the region as one of the world s economic power centres from three temporal perspectives 500 years 150 years and 50 years each denoting an epoch in regional and world history and providing a vantage point against which to assess contemporary developments
